

Black Force

FEATURES

BODY:

- Made of zinc alloy.
- Double anchoring system of the body with through axle that avoids the padlock's opening by striking.

SHACKLE:

- Made of hardened steel.
- 4 models available: standard shackle, long shackle, protected standard shackle and protected long shackle.
- Diameter: 8 mm.

OPENING / CLOSING:

- 10-digit 4-dial combination (10.000 differs to choose).

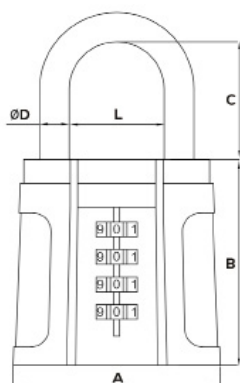

OTHER FEATURES:

- Double locking system with high tensile strength.
- Available with or without a silicone cover to protect the padlock itself and the area it protects. The cover is supplied with the protected shackle models.

PACKAGING:

- Ideal for outdoor use, due to a special rust proof treatment.
- Blister.
